Synchrotron Radiation User Meeting 2015

2nd – 3rd September 2015
Diamond Light Source, UK

Featuring five parallel workshops representing a wide range of research interests, the Diamond Synchrotron Radiation User Meeting offers opportunities to hear about the latest in synchrotron research and technique developments, along with the chance to network with colleagues from Diamond and the synchrotron user community.

Workshops

- **Current Issues in Energy Research**
- **MX and Small Angle X-ray Scattering (SAXS)**
- **PDF Analysis: The Local Point of View of Materials Development**
- **Soft X-ray Full-field Imaging and Scanning Microscopy**
- **Transition Metal Oxides, Superconductivity and Interfaces**

Delegates are invited to submit posters to display – abstracts should be uploaded during online registration. Students and early career researchers are especially encouraged to attend.

Keynote speaker

We are pleased to announce that this year's keynote speech will focus on the life and work of **Henry Moseley** and will be delivered by **Professor Justin Wark, a Professor of Physics at the University of Oxford.**

Student day – 1st September

We will also be running our annual event for students and early stage researchers on **Tuesday 1st September**. The event will provide students with an introduction to the User Meeting and offer opportunities to meet Diamond science staff and other researchers.
