

# Synchrotron Radiation User Meeting

7<sup>th</sup> – 8<sup>th</sup> September 2016  
Diamond Light Source, UK

Featuring three parallel workshops representing a wide range of research interests, the Diamond Synchrotron Radiation User Meeting offers opportunities to hear about the latest in synchrotron research and technique developments, along with the chance to network with colleagues from Diamond and the synchrotron user community.

## Workshops

- **Developments in the Environmental Sciences**
- **Long Duration Experiments: Current Capabilities and Future Possibilities**
- **New Frontiers and Emerging Techniques\***

\* This will be a large, double capacity workshop focusing on electron microscopy and XFEL techniques in both the physical and life sciences.

Delegates are invited to submit posters to display – abstracts should be uploaded during online registration. Students and early career researchers are especially encouraged to attend.

## Keynote speaker

We are pleased to announce that this year's keynote speech will be delivered by Professor Wah Chiu from Baylor College of Medicine, and will focus on cryo-electron microscopy; the technical challenges and its synergy with synchrotron based techniques.

## Student day – 6<sup>th</sup> September

We will also be running our annual event for students and early stage researchers on Tuesday 6th September. The event will provide students with an introduction to the User Meeting and offer opportunities to meet Diamond science staff and other researchers.
