

Synchrotron Radiation User Meeting 2014

**3rd – 4th September 2014
Diamond Light Source, UK**

Featuring five parallel workshops representing a wide range of research interests, the Diamond Synchrotron Radiation User Meeting offers opportunities to hear about the latest in synchrotron research and technique developments, along with the chance to network with colleagues from Diamond and the synchrotron user community.

Workshops

- MX & Circular Dichroism
- Coherence, Diffraction & Imaging
- Surfaces, Interfaces & Symmetry
- Time Resolved & Dynamic Studies
- Geoscience

Delegates are invited to submit posters to display – abstracts should be uploaded during online registration. Students and early career researchers are especially encouraged to attend.

Keynote speaker

We are pleased to announce that this year's keynote speech will be delivered by Professor John Spence, Director of the BioXFEL consortium, a National Science Foundation Science and Technology Center, New York, USA.

Student day – 2nd September

We will also be running our annual event for students and early stage researchers on Tuesday 2nd September. The event will provide students with an introduction to the User Meeting and offer opportunities to meet Diamond science staff and other researchers.

See diamond.ac.uk for more information and to register
